NPIC/TSSG/ESD/EL-65/69

7 July 1969

MEMORANDUM FOR: Chief, Development & Engineering Division, TSSG
THROUGH: Chief, Engineering Support Division, TSSG
SUBJECT: Request for Support
REFERENCE: Memorandum NPIC/TSSG/DED-1682-69 dated 25 June 69

1. In the reference it was requested that the Exploratory Laboratory provide the following services:

- i. Measure the contrast of a set of resolution targets.
- ii. Measure the density of several frames of operational imagery.
- iii. Measure the resolution of a film viewer without the screen.

2. Item (i) has been accomplished and the results delivered to [] of Boeing. [] of the Exploratory Laboratory in conversations with [] of DED discussed items (ii) and (iii). Since EL has no capability for routinely tracing 9" film on a Micro-Densitometer but APSD does have this capability, arrangements were made by [] to have that item performed by APSD. Item (iii) will be relatively routine to perform, however, the viewer is not available at this time. [] said he would notify EL when the viewer becomes available.

3. No further work is planned on this project by EL until the viewer becomes available.
